Who are we?

Regnum Construction® is the participation of Regnum Group which is an expert company in the field of construction of the USA origin. Regnum Construction® is a construction company which presents engineering solutions to the construction sector in the manufacturing and servicing fields. Regnum is particularly specialized in rebar coupler, rebar connections, anchorages, ground equipment, and technological construction elements. Having expert engineers and technicians within the scope of its own field, Regnum presents the engineering solutions to the construction sector with the conception of continuous improvement and high quality.

Quality

All Regnum equipment are designed and manufactured according to the installation and work in the factory and site. The machines have CE and related certificates and are used by the expert technicians to give high quality service. In the required projects, the fast installation is made in the site, and the anchorage and coupler service is given in-place.

WHY ARE THE REBAR EDGES HEADED?

Regnum couplers provide the standards of ASTM A706, ASTM A615, ASTM A996, TS708, BS8110, BS4449, ISO 15835 S2, ACI 318, BS8110, ISO 15835 S-1/S-2, Ts500.
